CAREER OBJECTIVE

Motivated and detail-oriented Computer Science undergraduate with a strong foundation in Java, Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), and SQL. Seeking a Software Engineering Internship where I can apply my technical skills, contribute to innovative projects, and continuously learn while delivering high-quality, well-tested software solutions.

TECHNICAL SKILLS

Programming Languages: Java, C++, C

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js

Real-Time Communication: Socket.io

Databases: SQL

Machine Learning: Scikit-learn, Pandas, NumPy, Random Forest

Developer Tools: Git, GitHub, VS Code, Version Control

Core CS: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Debugging, Problem Solving

SOFT SKILLS

Leadership, Team Collaboration, Communication, Adaptability, Ownership

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering CGPA: 9.61 (till 4th Sem)

Kongu Engineering College — Expected 2028

HSC (12th Grade), Advaith International Academy, Hosur PCMB — 90.4%

AREAS OF INTEREST

Data Structures and Algorithms (DSA), Frontend Development, Machine Learning (Beginner)

PROJECTS

Campus Mart | Full Stack Developer (Solo Project)

Tech Stack: React.js, Node.js, Socket.io

- Independently designed and engineered Campus Mart, a full-stack marketplace platform enabling students to buy and sell items within their campus community.
- Built a responsive, interactive frontend using React.js for browsing, listing, and searching items.
- Implemented backend RESTful APIs using Node.js to manage listings, user data, and core application logic.
- Integrated real-time buyer-seller messaging using Socket.io, enabling instant in-app chat during transactions.

Pharmacy Inventory Management System | Backend Developer / Team Lead

Tech Stack: Core Java, SQLite

- Built a pharmacy inventory system in Core Java and SQLite with role-based authentication and full CRUD functionality for stock management.
- Designed real-time stock quantity tracking to reduce inventory discrepancies, and led the team on backend and schema design.

Loan Approval Prediction System | Machine Learning Developer

Tech Stack: Python, Pandas, NumPy, Scikit-learn, SMOTE, Matplotlib, Joblib

- Trained a loan approval prediction model using a Random Forest Classifier on applicant financial data.
- Performed data preprocessing including missing value handling, categorical encoding, and feature scaling to improve model reliability.
- Applied SMOTE to address class imbalance and optimized the model using RandomizedSearchCV with cross-validation.
- Evaluated model performance using Accuracy, Precision, Recall, F1-score, ROC-AUC, and Confusion Matrix analysis.

ACHIEVEMENTS

- Received cash prize for Academic Excellence Award.
- Shortlisted for Idea Submission, Smart India Hackathon (SIH) 2025.
- 400+ problems solved on LeetCode; 500+ on GeeksforGeeks; active Codeforces contestant.

CERTIFICATIONS

- NPTEL — Cyber Security and Privacy
- Machine Learning and Deep Learning using Python
- Infosys Springboard — C++ Certification
